

Lesson 27: Quiz 6 - Division

Multiplication Table

X	0	1	2	3	4	5	6	7	8	9	10	11	12
0	0	0	0	0	0	0	0	0	0	0	0	0	0
1	0	1	2	3	4	5	6	7	8	9	10	11	12
2	0	2	4	6	8	10	12	14	16	18	20	22	24
3	0	3	6	9	12	15	18	21	24	27	30	33	36
4	0	4	8	12	16	20	24	28	32	36	40	44	48
5	0	5	10	15	20	25	30	35	40	45	50	55	60
6	0	6	12	18	24	30	36	42	48	54	60	66	72
7	0	7	14	21	28	35	42	49	56	63	70	77	84
8	0	8	16	24	32	40	48	56	64	72	80	88	96
9	0	9	18	27	36	45	54	63	72	81	90	99	108
10	0	10	20	30	40	50	60	70	80	90	100	110	120
11	0	11	22	33	44	55	66	77	88	99	110	121	132
12	0	12	24	36	48	60	72	84	96	108	120	132	144

Solve the problems using the chart above.

Use the chart if you need, but try to memorize your facts. It will really help you solve math problems faster!

1. $24 \div 4 = \underline{\quad}$

2. $12 \div 2 = \underline{\quad}$

3. $27 \div 3 = \underline{\quad}$

4. $40 \div 8 = \underline{\quad}$

5. $72 \div 9 = \underline{\quad}$

6. $54 \div 6 = \underline{\quad}$

7. $81 \div 9 = \underline{\quad}$

8. $42 \div 7 = \underline{\quad}$

9. $18 \div 9 = \underline{\quad}$

10. Maria and Jack buy a shelving unit that is 9 feet long. They plan to cut it to make as many 3-foot-long shelves as they can. How many shelves will they be able to cut?

11. Megan is baking cookies for a party. Her friends believe in equality over all else, so she decides that each friend must get the same number of cookies. She bakes 60 cookies and invites 9 friends. Including Megan, how many cookies will each person get?
