

Connie's Coffee Café

Connie sells two types of coffee mugs in her cafe, a travel mug and a regular ceramic style mug. She sells the travel mugs for \$5.75 each, and the ceramic mugs for \$2.50 each. When she opened her café today, she had a total of 200 mugs. When Connie closed the shop for the day, she had sold 12 mugs and made \$56. How many mugs of each size did she sell today?
