

Lesson 44: Percents - Changing Percents to Fractions

Purpose of lesson: You will learn how to change **percents** to **fractions**.

*All percents can be changed to fractions!
Let's see how it is done.*

To change a **percent (%)** to a fraction you need to:

- 1) Put the number over 100.
- 2) Then, **reduce** if possible.

Examples: a) $25\% = \frac{25}{100} = \frac{1}{4}$

b) $40\% = \frac{40}{100} = \frac{2}{5}$

c) $23\% = \frac{23}{100}$ This is lowest terms.

Now it's your turn to try!
