

## Lesson 13: Addition Using Money - Advanced

Sometimes the \$.00 is not used when a rounded dollar amount is being added.  
For example: \$10.00 is often written \$10. If this occurs, you need to put in the .00 in order to keep your numbers in the proper places.

Example: \$10 + \$6.79 = **\$16.79**

You should write it this way:

\$10.00
+ 6.79
<b><u>\$16.79</u></b>
