

Lesson 31: Quiz 1 – Dividing Numbers by Two Digits

Complete the following practice problems. Don't forget your steps: **Divide, Multiply, Subtract and Bring Down.**

Example:

$$\begin{array}{r} 12 \\ 53 \overline{)641} \text{ R}5 \end{array}$$

The answer is 12R5.

1) For the problem $\begin{array}{r} 63 \\ 12 \overline{)766} \text{ R} \end{array}$, the value for the remainder is = _____

2) For the problem $\begin{array}{r} \\ 26 \overline{)415} \text{ R}25 \end{array}$, the value for the remainder is = _____

Solve these problems, and give your answer with both the quotient and the remainder.

Example: Record your answer as **6R13** where the quotient is **6** and the remainder is **13**. If there is no remainder, just record the quotient as the answer.

3. $69 \overline{)1270}$

4. $11 \overline{)2211}$

5. $28 \overline{)603}$

Let's do some problems with money! Don't forget to include the dollar sign and decimal point in your answer!

6. $13 \overline{)\$36.53}$

7. $80 \overline{)\$74.40}$

8. $11 \overline{)\$12.54}$

9. $19 \overline{)\$8.17}$

10. $12 \overline{)\$5.64}$

11. $50 \overline{)\$125.00}$
