

## Lesson 12: Addition Using Money

Our system of money uses a dollar sign (\$) and a decimal point (.) to separate dollars and cents, for example: \$9.99 (nine dollars and ninety-nine cents). When performing any math operations with money, you need to use the same skills you learned when working with decimals.

**Don't forget to line up the decimal points.**

Example:  $\$10.21 + \$9.78 = \underline{\$19.99}$

$$\begin{array}{r} \$10.21 \\ + 9.78 \\ \hline \$19.99 \end{array}$$

Now try these:
