

## Lesson 9: Addition Using Carrying (Regrouping)

- As numbers get larger when you add, you may be required to carry (regroup). In the example below, when adding the column in the far right or the ones column ( $3+5+2$ ) the result is 10. For the total put down a '0' and carry (regroup) the number 1. Add 1 to the next column.
- Follow the same carry (regroup) procedure in the tens, hundreds and thousands place, etc.

Example:  $23 + 145 + 312 =$

$$\begin{array}{r} 1 \\ 23 \\ 145 \\ +312 \\ \hline 480 \end{array}$$

Now try these:
